

Dr. Mariella Ippolito got a bachelor degree cum laude in Physics at University Tor Vergata of Rome (2003). She got a Ph.D. in Physics at University of Cagliari (2006). Currently she is a member of CINECA SCAI department. Her main working activity consists of supporting material science users in compiling, optimising and running their applications on CINECA architectures. She is also responsible for the user support of MAX Centre of Excellence. She has a multiple years experience with the most widespread molecular dynamic codes used by materials science community, both ab-initio and classical.
