

Luca Leuzzi is the CNR-NANOTEC Rome Unit Director at Sapienza University and Vice president of the ATOM Technical and Management Committee.

Graduated in Physics *cum laude* in Rome Sapienza in 1998, he obtained his PhD degree at the Institute for Theoretical physics of the University of Amsterdam (Netherlands) in 2002, *summa cum laude*.

He is a CNR researcher in statistical physics at the CNR-NANOTEC and works in disordered and amorphous systems, such as glasses and spin-glasses, and in optics in complex media, random lasers, imaging and focusing across random media.

He has been lecturer at the Vito Volterra PhD school on Physics at Sapienza University from 2006 to 2018 and he is currently lecturer for Probability Theory and Computational Physics courses for the degree in Physics at Sapienza University.
