

Marco Villani received the M.S. degree in electrical engineering from the University of L'Aquila, Italy, in 1985. He became an Assistant Professor of power converters, electrical machines, and drives in 1993. In 1990, he was Research Fellow at the University of Dresden and in 1995 at the WEMPEC, Nagasaki University. In 1998 he cooperated in two EU-SAVE projects concerning the Energy efficiency improvements in three-phase induction motors.

Since 1990 he took the responsibility of several national research projects and contracts between the University of L'Aquila and industrial partners. Currently he is also the person in charge for the European H2020 project "RefreeDrive" on the electric vehicles.

He is currently Associate professor of Electrical Machines Design for Master-level degree courses of Electrical Engineering at the University of L'Aquila. His research interests are focused on modeling and design of electrical machines, He is author of more than 150 technical papers in scientific journals and conference proceedings.
