

Dr. Elvio Carlino is senior researcher at the Institute for Microelectronics and Microsystems (IMM) of the National Council for Research (CNR) in Lecce. His research activity since 1985 has been dedicated to the application and developments of new TEM/STEM methodologies for the studies of the structural, chemical, electronic and magnetic properties of matter. He directed: the PASTIS-CNRS microstructural research division (1997-2001); the Center of Electron Microscopy of the TASC-INFN National laboratory in Trieste (2001-2007); the Center for Electron Microscopy of the IOM-CNR institute in Trieste (2007-2017).
