

Andrea Ciurli is Ph.D. student in Biotechnology at the University of Verona. He graduated cum laude in July 2017, in Plant and Microbial Biotechnology at the University of Pisa; Andrea completed the MSc thesis in Sapporo (Japan), during which he studied the nitrate reductase modulation in response to changes in C/N balance (Plant and Cell Physiology, Volume 59, Issue 6, June 2018, Pages 1248–1254). Since October 2017, Andrea's research is aiming to clarify the mechanisms of action and molecular effects of FePO₄ nanoparticles when they are used as fertilizers in the plant-soil system. Andrea is member of SICA since September 2018.
