

Johannes Carolus (John) Jansen is researcher of the Institute on Membrane Technology, ITM-CNR, in Rende, Italy. He obtained his Master's degree (1990) and his PhD degree (1996) in the department of Polymer Technology of the Faculty of Chemical Technology and Materials Science of the Delft University of Technology (TU Delft) in The Netherlands. After a short period as a visiting researcher at DSM Resins (Zwolle, NL) and two and a half years at the Agrotechnological Research Institute, ATO-DLO (Wageningen, NL), he moved to Italy to the Institute of Macromolecular Chemistry, ICM-CNR, in Milan. In his present position, since December 2001, he leads a small group dedicated to membranes for gas and vapour separation. His main expertise ranges from polymer synthesis and characterization, to the preparation, characterization and transport properties of polymeric membranes. Since his role as the coordinator of the EU's 7th Framework project *DoubleNanoMem*, he has been responsible for a number of national and international public and industrial research projects. He holds one course as a guest professor on "Engineering of Polymeric materials and Membranes" at the University of Calabria, is author of over 120 original research papers, reviews and book chapters, with a h-index of 37.
