

Leoluca Liggio, can count on over thirty years of experience in IBM Italia, where he covered important and strategic roles. After the IBM experience he worked also for the KPMG Advisory Company, in Poland, and in the same time he founded a private consulting firm (the Tedra Solutions). Since 2012 he is program manager at the Distretto Tecnologico Sicilia Micro e Nano Sistemi S.c.a.r.l. (Catania), a Consortium of firms that aims to implement the research, the development & the high education in micro-nano technology. As a Project Manager of strategic projects during his career he exercised leadership skills in managing complex teams. He also is, since 2006, a Certified Member (CMC) as management consultant inside APCO (the Italian Association of management and organization Consultants). He has also been formally selected through public tender issued by the Regione Sicilia Government in the list of expert engineer for the evaluation of strategic projects to be potentially admitted to receive the Public grant. At the moment he carries the responsibility for the coordination and leadership of the WInSiC4AP project and for the relationship with ECSEL JU.
