

Pilar Ortiz

Ph.D. Chemist

Senior Lecturer.

Expertise in diagnosis for Cultural Heritage (CH). Expertise in quality management and e-learning.

Leader of the Research Group 'Cultural Heritage, Technology and Environment'.

My research activity (more than 20 years) has focused on four research lines: a) Risk and vulnerability in cultural heritage, b) Mineralogy applied to study the environmental influence in conservation of historical heritage. b) Construction materials, c) innovation in science teaching, especially on Cultural Heritage Diagnosis.

My management activity has been focused on quality management and e-learning.

Scientific production can be summarized in 40 books and / or book chapters, 20 publications SCI, 40 congress/conferences, 26 Participation in projects funded by the European Union, Ministry, Regional Communities, Public and Private Companies, 16 as principal research.

2015 2nd award from EMRS for science dissemination.
